APRIES Ending Slavery in Sub-Saharan Africa: A Collective Impact Approach

APRIES
African Programming & Research Initiative to
ENDSlavery

THEORY OF CHANGE

COLLECTIVE IMPACT ⇒

STRATEGIES → OUTPUTS → OUTCOMES → MISSION
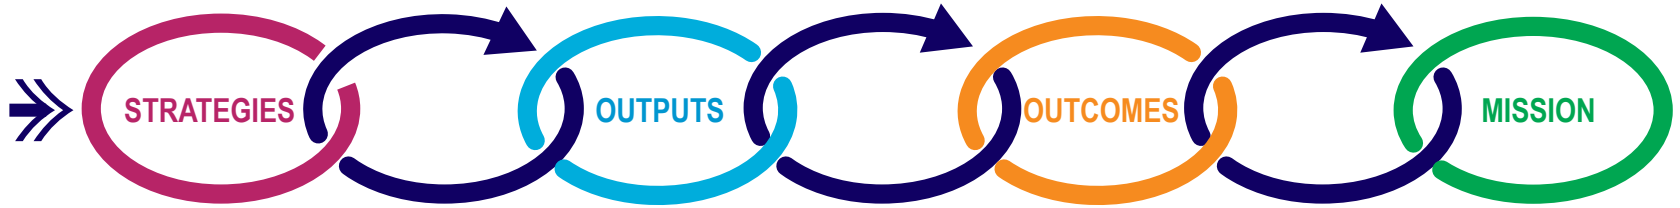

A commitment by APRIES to form a coalition of important actors from different sectors for ending slavery conditions at scale. The 5 conditions of the Collect Impact Approach:

Common Agenda

Shared Measurement

Mutually Reinforcing Activities

Continous Communication

Backbone Organization

EXPLORE
Establish a common agenda with all key partners

→ Establish administrative center (AC)

PREPARE
Develop a database of key stakeholders, prevalence data, and service gaps

→ **Engage key stakeholders**
Collect prevalence data
Identify common indicators
Identify service gaps

IMPLEMENT
Transform programs to prosecute, protect, and prevent modern slavery

→ **Select implementing partners**
Build capacity
Provide technical assistance
Evaluate impact

SUSTAIN
Support implementing partners to sustain and grow program through on-going support

→ **On-going support from APRIES**
Evaluate Impact

Robust prevalence data in 2 targeted countries

Transformative evidence-based programs and services

Sustainable data collection and services

→ **To drastically reduce the prevalence of modern slavery in sub-Saharan Africa**

ULTIMATE IMPACT
People are freed from all forms of violence with civil and human rights protections

---

Key Assumptions
• No single organization can end slavery
• Large-scale social change comes from better cross-sector coordination
• Survivors' voices are essential for success in prosecution, protection, and prevention
• Public and private sectors are essential partners

Challenges
• Slavery is a complex, multi-sector social problem
• Uncoordinated, isolated efforts currently exists with limited funding for scaling up
• Limited understanding of prevalence and impact of exisiting efforts due to hard to reach populations and limited measurement methodolgy

Objectives
1) Collect, analyze, and establish robust baseline data on the prevalence of modern slavery in target communities in Sierra Leone and Guinea.

2) Enhance the quality and scope of our implementing partners' anti-slavery operations in 5-10% reduction in baseline reporting and 25% increase in number of victims served

APRIES Values
Evidence-based Programming • Cross-sector Action • Diversity • Cultural Responsiveness • Empathy • Integrity
